

Project Completion Notification

BYWAY 04 COGGESHALL SURFACE IMPROVEMENT

SCHEME OBJECTIVE: The existing route with its status as Byway provides an off-road walking, cycling and horse riding, carriage driving and motorised vehicular opportunity for the local community and the public in general especially amongst a number of other byways and bridleways in the area. This also forms a link to other footpaths and the Marks Hall Estate.

The lane becomes highly waterlogged and rutted and is very difficult to negotiate and could be preventing some use. Therefore the purpose of the scheme is to undertake improvement works (drainage and surfacing) to improve accessibility for all users.

SCHEME SUMMARY & OUTCOME: Infilling of ruts with suitable graded material and overlaying with road planings. Clearance of grips and creation of new ones. Clearance of vegetation to the sides and clearance of ditches where necessary in order to improve the surface for users. The outcome of the works is a much improved surface of this byway that has both a rural look and feel about it which allows the a much safer passage of users along it.
