BYWAY 34 Widdington – DRAINAGE & SURFACE IMPROVEMENT

SCHEME OBJECTIVE: The existing route with its status as Byway provides an off-road walking, cycling and horse riding, carriage driving and motorised vehicular opportunity for the local community and the public in general especially amongst a number of other byways and footpaths in the area.

The lane becomes highly waterlogged and rutted and is very difficult to negotiate and could be preventing some use. Therefore, the purpose of the scheme is to undertake improvement works (drainage and surfacing) to improve accessibility for all users.

The works completes a 3yr phased programme of works to improve the surface of the entire lane.

SCHEME SUMMARY & OUTCOME: Infilling of ruts and build up the sunken track with suitable graded material and overlaying with road planings. Clearance of grips and creation of new ones where required. Clearance of vegetation to the sides. The outcome of the works is a much-improved surface and drainage of this byway that has both a rural look and feel about it which allows a much safer passage of users along it.
